New York 11, N. Y.

Translation of the Journal of General Chemistry of the USSR began with Volume XIX, 1949. Complete volumes of this translation are available for 1950 through 1954 at $95.00 per volume.

# TABLE OF CONTENTS

## Volume XXIV

| | | Page | Russian page |
|---|---|---|---|
| | JANUARY | | |
| 1. | Reaction of Iodine Chloride and Iodine Trichloride with Hypophosphorous Acid. Ya.A. Fialkov and F.E. Kagan | 1 | 3 |
| 2. | Catalysts of the Decomposition of Hydrogen Peroxide. G.M. Zhabrova, S.Z. Roginsky and E.A. Fokina | 7 | 10 |
| 3. | Reaction of Difficultly Soluble Salts with Cationic Substances. A.G. Koblyansky | 17 | 18 |
| 4. | Chemical Reactions in Vanadium Pentoxide – Potassium Sulfate and Vanadium Pentoxide – Potassium Pyrosulfate Systems. G.K. Boreskov, V.V. Illarionov, R.P. Ozerov and E.V. Kildisheva | 21 | 23 |
| 5. | Distribution of Isomorphic and Isodimorphic Components between the Solid and Liquid Phases during Crystallization from Aqueous Solutions. II. Equilibrium in Certain Systems with Schoenite (Picromerite) Type Double Salt Components. G.I. Gorshtein and N.I. Silantyeva | 27 | 29 |
| 6. | Investigation of Complex Formation between the Bismuth Ion and the Ions of Tartaric Acid. A.S. Tikhonov | 33 | 37 |
| 7. | The Thermodynamics of Oxide Phases of Variable Composition. I. The Thermodynamics of Ferrous Oxide. S.M. Ariya, M.P. Morozova and L.A. Shneider | 37 | 41 |
| 8. | Physico-Chemical Analysis of the System: Aluminum Chloride – Acetamide – Water. B.Ya. Rabinovich | 43 | 48 |
| 9. | Physico-Chemical Investigation of the Reaction of Titanium Tetrachloride with Ethyl Acetate. Yu.A. Lysenko and O.A. Osipov | 49 | 53 |
| 10. | Kinetics of the Aquatization of Urea Complexes of Chromium. K.B. Yatsimirsky and E.I. Yasinskene | 53 | 55 |
| 11. | Determination of the Composition and the Instability Constants of Complex Compounds between Metals and Thiourea by a Polarographic Method. II. O.S. Fedorova | 59 | 62 |
| 12. | Polarographic Investigation of the Hydrogenation Process. III. Hydrogenation of Acetylenedicarboxylic Acid. A.L. Markman | 65 | 65 |
| 13. | The Hydrogen Bond and the Density of Solutions. A.E. Lutsky | 73 | 74 |
| 14. | Physico-Chemical Analysis of the Nitric Acid – Acetic Acid System. Atomic Concentration and Corrosive Properties of the System. A.V. Titov | 77 | 78 |
| 15. | Investigation of the System: Tetranitromethane – Benzene by Various Physico-Chemical Analytical Methods. B.V. Ioffe and L.S. Lilich | 81 | 81 |
| 16. | Study of the Reaction of 8-Hydroxyquinoline with Organic Acids by the Methods of Physico-Chemical Analysis. D.I. Dionisyev and Z.K. Dzhelomanova | 89 | 88 |
| 17. | Alkylation of Aromatic Hydrocarbons with Olefins in the Presence of Metallic Aluminum and Halogen Derivatives. N.G. Sidorova, I.P. Tsukervanik and E. Pak | 93 | 94 |
| 18. | Investigation of the Migration Routes of the Hydrogen Atom during Certain Oxidation-Reduction Reactions. I. A.F. Rekasheva and G.P. Miklukhin | 95 | 96 |
| 19. | Investigation of the Migration Routes of the Hydrogen Atom during Certain Oxidation-Reduction Reactions. II. A.F. Rekasheva and G.P. Miklukhin | 105 | 106 |

| | | Page | Russian page |
|---|---|---|---|
| 20. | Amidation of Carboxylic Acids with Amides of Phosphoric Acid. A.V. Kirsanov and E.A. Abrazhanova | 117 | 120 |
| 21. | Tribromophosphazosulfonaryls. A.V. Kirsanov and Yu.M. Zolotov | 119 | 122 |
| 22. | The Reaction of Dialkylphosphorous Acids with Aldehydes and Ketones. VI. Esters of α-Hydroxypropylphosphinic Acid. V.S. Abramov and N.A. Ilyina | 121 | 124 |
| 23. | Parachors of Certain Esters of Ethyleneglycolarsonic Acid. Gilm Kamai and K.I. Kuzmin | 125 | 128 |
| 24. | Investigations in the Field of Quinoline Derivatives. X. Syntheses of Quinolines from Diethylidenearylamines. B.I. Ardashev | 127 | 131 |
| 25. | Synthesis of Piazothiole (3,4-Benzo-1,2,5-thiodiazole) and Its Derivaties. II. A.M. Khaletsky and V.G. Pesin | 131 | 133 |
| 26. | The Conversion of Uric Acid into 8-Methylxanthine. I. Structure of the Intermediate Substance. E.S. Golovchinskaya | 135 | 136 |
| 27. | The Conversion of Uric Acid into 8-Methylxanthine. II. Action of Mineral Acids on 4,5-Di-(acetylamino)-uracil. E.S. Golovchinskaya | 145 | 146 |
| 28. | Synthesis of Derivatives of Phenothiazine-1-carboxylic Acid. N.V. Savitskaya and M.N. Shchukina | 151 | 152 |
| 29. | Acetylene Derivatives. 165. Treatment of Acetylenic Alcohols and Glycols with Acrylonitrile. I.N. Nazarov and G.A. Shvekhgeimer | 157 | 157 |
| 30. | The Cyanethylation of Cyclic and Heterocyclic Alcohols and Amines. Hydrogenation and Alcoholysis of the Cyanethylation Products. I.N. Nazarov and G.A. Shvekhgeimer | 165 | 163 |
| 31. | Pyridine Dye Derivatives of Diphenyl. N.E. Grigoryeva and I.K. Gintse | 171 | 169 |
| 32. | Investigation of Organic Isocyanates. III. Reaction of Aromatic Isocyanates with Halogens. N.S. Dokunikhin, L.A. Gaeva and I.D. Pletneva | 177 | 174 |
| 33. | Reaction of N,N'-Bis-(halomagnesium)-arylamines with Esters and Acid Halides. P.A. Petyunin, I.S. Berdinsky and V.S. Shklyaev | 181 | 178 |
| 34. | Steric Hindrance and Properties of Certain Arylaminonaphthoquinones. I.F. Vladimirtsev, I.Ya. Postovsky and L.F. Trefilova | 183 | 181 |
| 35. | Synthesis and Reactions of 3,4-Diketones of the Tetrahydrofuran Series. I.K. Korobitsyna, Yu.K. Yuryev and O.I. Nefedova | 191 | 188 |
| 36. | Response to the Article of G.V. Tsitsishvili Apropos of the Work of A.A. Kalandiya Entitled, "Calculation of Molecular Volumes of Inorganic Compounds of the $A_nB_mO_s$ Type". A.A. Kalandiya | 197 | 193 |
| | FEBRUARY | | |
| 37. | Distribution of Isomorphic and Isodimorphic Components Between the Solid and Liquid Phases During Crystallization from Aqueous Solutions. III. Equilibrium in the System $Co(NO_3)_2-Ni(NO_3)_2-H_2O$ at 20°. G.I. Gorshtein and N.I. Silantyeva | 201 | 200 |
| 38. | The Hydrogen Bond and the Viscosity of Solutions. A.E. Lutsky | 203 | 203 |
| 39. | The Reaction of Nitrates of Metals of the First Group of the D.I. Mendeleev Periodic Table with Cadmium Nitrate in Melts. I. Conductance of the Binary Systems: Lithium Nitrate–Cadmium Nitrate and Sodium Nitrate–Cadmium Nitrate in Melts. N.P. Popovskaya and P.I. Protsenko | 207 | 207 |
| 40. | Reaction of Lead Titanate with Salts in Melts. I.N. Belyaev, M.L. Sholokhovich and G.V. Barkova | 211 | 211 |

| | | Page | Russian page |
|---|---|---|---|
| 41. | Behavior of Magnesium in Alkaline Solutions. E.I. Levitina | 215 | 216 |
| 42. | Reaction of Barium Titanate with Salts in Melts. M.L. Sholokhovich and I.N. Belyaev | 219 | 218 |
| 43. | Cracking of Normal Paraffinic Hydrocarbons in the Presence of Aluminum Chloride. I. Cracking of n-Heptane and n-Nonane. L.A. Potolovsky and G.S. Spektor | 225 | 225 |
| 44. | Investigations in the Field of Alcohol Oxides (Oxidols). II. Preparation and Properties of α,β-Alcohol Oxides of the Aliphatic Series. V.I. Pansevich-Kolyada and L.A. Kureichik | 231 | 231 |
| 45. | The Synthesis of Certain β-Hydroxy Acids and Their Esters. G.M. Borodina | 235 | 235 |
| 46. | Condensation of Diketene with Certain Aliphatic Ketones. Kh.V. Balyan and A.L. Shtangeev | 239 | 238 |
| 47. | Monovinylacetylene Homologs. III. Cyclic Diene Ethers. I.A. Favorskaya and L.V. Fedorova | 243 | 242 |
| 48. | Condensation of Aniline with Glycerin, Paraldehyde and Acetylene over Aluminum Silicate. R.D. Obolentsev, Yu.N. Usov and Yu.V. Enkov | 251 | 252 |
| 49. | Cycloalkylation of Aromatic Compounds. VIII. Condensation of 2-Methylcyclohexanol and 3-Methylcyclopentanol with Benzene. N.G. Sidorova | 255 | 255 |
| 50. | Photoreactions of Metalloorganic Compounds of Mercury in Solutions. XIV. Photoreactions of β-Mercuribispropionic Acid and its Dimethyl Ester. G.A. Razuvaev, Yu.A. Oldekop and V.N. Latyaeva | 259 | 260 |
| 51. | Reaction of Acyl Peroxides with Metals and Metal Chlorides (Tin and Antimony). G.A. Razuvaev, B.N. Moryganov, E.P. Dlin and Yu.A. Oldekop | 263 | 262 |
| 52. | Reaction of Methyl-α-naphthylmercury and Methylphenylmercury with Organic Acids. A.A. Bolshakova | 267 | 266 |
| 53. | Destructive Hydrogenation of Tetraethylsilane. M.G. Voronkov, B.N. Dolgov and G.B. Karpenko | 271 | 269 |
| 54. | Synthesis of Certain Phenamine Derivatives. F.Yu. Rachinsky and N.M. Vinokurova. | 275 | 272 |
| 55. | Several Benzothiazole Derivatives. V. Synthesis of 5-Substituted 6-Dimethylamino-2-Methylbenzothiazoles. I.I. Levkoev, N.N. Sveshnikov, I.N. Gorbacheva, N.S. Barvyn and T.V. Krasnova | 281 | 280 |
| 56. | Investigation of the Reduction of γ-Dinitriles by Vyshnegradsky's Method. A.P. Terentyev and V.G. Yashunsky. | 295 | 291 |
| 57. | Conversion of Hydroaromatic Aldehydes and Ketones into Aromatic Hydrocarbons by Dehydration. A.A. Petrov and N.P. Sopov | 299 | 298 |
| 58. | Thermocatalytic Conversions of Butylnaphthalenes. B.G. Gavrilov and E.N. Nikitina | 305 | 303 |
| 59. | Action of Alkyl Halides and Allyl Bromide on Sodium Dibutylthiophosphite. A.N. Pudovik and K.A. Kovyrzina | 309 | 307 |
| 60. | Reaction of Dialkylphosphorous Acids with Aldehydes and Ketones. VII. Esters of γ-Hydroxy-(6-quinolyl)-methylphosphinic Acid. V.S. Abramov and A.S. Kapustina | 313 | 311 |
| 61. | Investigations in the Field of Quinoline Derivatives. XI. Synthesis of Lepidine and its Derivatives from Acetylated Arylamines. B.I. Ardashev and B.A. Tertov | 317 | 314 |
| 62. | Catalytic Condensation of Acetylene with Aromatic Amines. XXIV. Catalytic Synthesis of 2-(p-Methylphenyl)-quinoline and its Derivatives. N.S. Kozlov and N.I. Panova | 323 | 317 |

| | | Page | Russian page |
|---|---|---|---|
| 63. | Cyanethylation of Cyclic and Heterocyclic Ketones. Reduction and Cyclization of the Cyanethylation Products. L.N. Nazarov, G.A. Shvekhgeimer and V.A. Rudenko | 325 | 319 |
| 64. | Hydrolysis, Alcoholysis and Hydrogenation of β-Cyanethyl Ethers of Glycols. L.N. Nazarov, G.A. Shvekhgeimer and V.A. Rudenko | 337 | 329 |
| 65. | Investigation of the Nature of the Catalysts used for Isomerization and Polymerization of Hydrocarbons. I. Concerning the Cause of the Catalytic Activity of Titanic Acid. G.A. Rudakov and Z.S. Khomenko | 345 | 337 |
| 66. | Investigation in the Field of Hydroxyfuchsone Dyes. XIX. Influence of the Nitro Group and Halogens on the Indicator Properties of Derivatives of 3,3'-Dimethoxybenzaurin. I.S. Ioffe and B.G. Belenky | 351 | 343 |
| 67. | Investigation in the Field of Hydroxyfuchsone Dyes. XX. Influence of the Nitro Group and Halogens on the Color of Derivatives of 3,3'-Dimethoxybenzaurin. I.S. Ioffe and B.G. Belenky | 359 | 353 |
| 68. | Carboxylic Anhydrides of Amino Acids as Structural Fragments in the Protein Molecule. II. L.N. Akimova and N.I. Gavrilov | 367 | 361 |
| 69. | On the Structure of Gramicidin C. I. Reduction of Gramicidin C. P.G. Ioanisiani, N.I. Gavrilov and M.I. Plekhan | 371 | 364 |
| 70. | Synthesis of the Ethyl Ester and Amide of $\alpha_1$-Aminonicotinic Acid. A.M. Khaletsky and L.Sh. Gurevich | 377 | 369 |
| 71. | Synthesis and Properties of Azomethines from Weakly Basic Aromatic Amines. B.A. Porai-Koshits and A.L. Remizov | 381 | 372 |
| 72. | Synthesis and Physiological Activity on Plants of Isopropyl Esters of Certain Arylcarbamic Acids. Yu.A. Baskalov and N.N. Melnikov | 385 | 376 |
| 73. | Synthesis of Organophosphorous Compounds from Hydrocarbons and their Derivatives. III. Reaction of Acetylenic Hydrocarbons with Phosphorous Trichloride and Oxygen. Yu.M. Zinovyev, L.I. Muler and L.Z. Soborovsky | 391 | 380 |
| 74. | Investigations in the 1,2-Naphtho-(3',4')-furazan Series. II. Nitration and Chlorination of 1,2-Naphtho-(3',4')-furazan. S.V. Bogdanov and S.F. Petrov | 395 | 385 |
| | MARCH | | |
| 75. | The Development of the Theory of Chemical Structure in the Works of V.V. Markovnikov. V.V. Razumovsky | 403 | 393 |
| 76. | Mechanism of Hydrogen Exchange and of Some Protolytic Reactions in Solutions. A.I. Brodsky | 421 | 413 |
| 77. | Thiosulfate Complexes of Mercury. V.F. Toropova | 429 | 423 |
| 78. | Double Decomposition in the Reciprocal System of the Sulfates and Molybdates of Sodium and Silver in Melts. L.N. Belyaev and A.K. Doroshenko | 435 | 427 |
| 79. | Preparation of Pure Vanadyl Chloride Solution. V.L. Zolotavin | 441 | 433 |
| 80. | Cracking of Normal Paraffinic Hydrocarbons, in Presence of Aluminum Chloride. II. Cracking of n-Hexadecane. L.A. Potolovsky and G.S. Spektor | 443 | 434 |
| 81. | The Hydrogen Bond and the Physical Properties of Some Substituted Phenols and Anisoles. A.E. Lutsky | 449 | 440 |
| 82. | The Dibromides of Butadiene and its Homologs. Ya.M. Slobodin | 453 | 444 |

| | | Page | Russian page |
|---|---|---|---|
| 83. | The Process of Formation of Polyamide Resins. IV. Stepwise Character of the Process of Formation of Polyamide Resins and of the Products of Reaction of ε-Caprolactam with Adipic Acid. A.S. Shpitalnyi, K.E. Perepelkin and E.A. Meos | 455 | 447 |
| 84. | Acylation of the Enol Form of Acetaldehyde. A.M. Sladkov and G.S. Petrov | 459 | 450 |
| 85. | The Role of the Oxidation-Reduction Properties of α-Hydroxy Ketones in Initiated Polymerization. S.N. Danilov and N.S. Tikhomirova-Sidorova | 463 | 455 |
| 86. | Isomerization of α-Hydroxyaldehydes. XIII. Transformations of α-Halogeno- and α-Hydroxyketones with a Primary Alcoholic Group. S.N. Danilov and N.S. Tikhomirova-Sidorova | 467 | 458 |
| 87. | α-Hydroxyisobutyronitrile as a Source of Hydrocyanic Acid in Addition Reactions. I.N. Nazarov and S.I. Zavyalov | 475 | 466 |
| 88. | Cyanoethylation of Cyclic β-Diketones. I.N. Nazarov and S.I. Zavyalov | 479 | 469 |
| 89. | Esters of Arylsulfonimidophosphoric Acids. A.V. Kirsanov and V.I. Shevchenko | 483 | 474 |
| 90. | Synthesis of Some N-Oxides of Phenazine Derivatives. I.Ya. Postovsky and E.I. Abramova | 493 | 485 |
| 91. | Imidazole Derivatives. XIII. Bromination of 1,2-Naphthimidazole. L.S. Efros, L.N. Kononova and Ya. Eded | 497 | 488 |
| 92. | Employment of Antimony Pentachloride in the Gustavson–Friedel-Crafts Reaction. A.M. Petrova | 501 | 491 |
| 93. | Epoxy Alcohols (Oxidols). III. Preparation and Properties of 2,3-Epoxy-2-methyl-4-benzyl-4-pentanol. V.I. Pansevich-Kolyada and V.A. Ablova | 503 | 493 |
| 94. | Compounds Containing a Three-Membered Oxide Ring. XI. Reaction of Ethyl β-Methyl-β-ethylglycidate with o- and p-Toluidine. V.F. Martynov and Ya. Kastron | 507 | 498 |
| 95. | Hydrogenation with Colloidal Palladium in Presence of Inhibitors. IV. Hydrogenation of Methylphenylethynyl Carbinol. Kh.V. Balyan | 511 | 501 |
| 96. | Imidazole Derivatives. XII. Oxidation of 1,2-Naphthimidazole. B.A. Porai-Koshits, L.N. Kononova and L.S. Efros | 517 | 507 |
| 97. | Reaction of Nitrostyrene with Some Compounds Containing Methylene Groups Activated by Carbonyl and Carboxyl Groups. V.V. Perekalin and A.S. Sopova | 523 | 513 |
| 98. | Synthesis of Organophosphorus Compounds from Hydrocarbons and Their Derivatives. IV. Formation of Derivatives of Dialkylphosphinic Acids from Alkyldichlorophosphines, Hydrocarbons and Oxygen. L.Z. Soborovsky and Yu.M. Zinovyev | 527 | 516 |
| 99. | Reaction of Triphenylantimony with the Sodium Salt of N-Bromoacetamide. L.P. Petrenko | 531 | 520 |
| 100. | Quinones. VI. Condensation of p-Benzoquinone with α-Amino Acids. I.S. Ioffe and Z.Ya. Khavin | 533 | 521 |
| 101. | Quinones. VII. Reaction of Chloro Derivatives of p-Benzoquinone with Ethyl Glycinate. I.S. Ioffe and Z.Ya. Khavin | 539 | 527 |
| 102. | Investigations in the 1,2-Naphtho-(3',4')-furazan Series. III. The Bisulfite Compound of 1,2-Naphtho-(3',4')-furazan and 6-Nitro-1,2-naphtho-(3',4')-furazan. S.V. Bogdanov and S.F. Petrov | 545 | 532 |
| 103. | Isolation of β-Sitosterol from Crude Phytosterol and Its Analysis. A.M. Khaletsky and I.M. Yurist | 549 | 535 |

| | | Page | Russian page |
|---|---|---|---|
| 104. | The Structure of Sulfonic Acids of 2-Amino-4-methylthiazole. II. Clarification of the Structure of the Sulfonic Acids of 2-Amino-4-methylthiazole with the Help of Infrared Spectra. S.G. Bogomolov, Yu.N. Sheinker, and I.Ya. Postovsky | 553 | 539 |
| 105. | Mechanism of Heterogeneous Catalytic Isomerization of Hydrocarbons over Acidic Catalysts. I. Mechanism of Interaction of Pinene, Camphene, and Limonene with Isomerization Catalysts – Titanium Dioxide and Activated Clay. G.A. Rudakov, Z.S. Khomenko and M.M. Shestaeva | 563 | 549 |
| 106. | Condensation of Phenylaluminum Diiodide with Aromatic Halogenated Derivatives. E.A. Vdovtsova and I.P. Tsukervanik | 571 | 558 |
| 107. | The Hydrogen Bond and the Physical Properties of 8-Hydroxyquinoline. A.E. Lutsky | 575 | 561 |
| 108. | The Number of Linear and Cyclic α-Aminoacid Bonds in the Protein Molecule. N.I. Gavrilov and L.N. Akimova | 577 | 563 |
| 109. | Inner Complex Salts of Azo Compounds. I. Complex Salts of Copper with Some o-Monohydroxyazo Compounds. V.I. Mur | 585 | 572 |
| 110. | β-Nitrovinyl-5-substituted Furans. Z.N. Nazarova | 589 | 575 |
| 111. | In Memory of Evgeny Alekseevich Ivanov | 593 | 579 |
| | APRIL | | |
| 112. | The Periodic Law of D.I. Mendeleev as a Basic Concept in Modern Chemistry. (On the 85th Anniversary of the Discovery of the Law). S.A. Shchukarev | 595 | 581 |
| 113. | Complex Formation of the Anion Type, Between Potassium and Sodium Pyrophosphates and Oxide Salts of the Type $MeO_4^{n-}$ (Me = S, Mo, Cr, W). A.G. Bergman and M.L. Sholokhovich | 605 | 593 |
| 114. | Complex Formation Reaction Between Divalent Cobalt and Dimethylglyoxime. A.K. Babko and M.V. Korotun | 609 | 597 |
| 115. | Problem of Causes for Inhibition of Synthesis of Aldehydes and Carboxylic Acids by the Catalytic Oxidation of Unsaturated Hydrocarbons. T.I. Andrianova and S.Z. Roginsky | 615 | 606 |
| 116. | Bromination of Unsaturated Compounds. A.V. Dombrovsky | 619 | 610 |
| 117. | A Method for Synthesis of Cyclic Acetaldehydeacetals. M.G. Voronkov and E.S. Titlinova | 623 | 613 |
| 118. | Investigations in the Field of Alkanosulfonic Acids. XI. Interaction of Alkanosulfonyl Chlorides with p-Chloroaniline and p-Nitroaniline. A.G. Kostsova | 629 | 618 |
| 119. | Spiro-(2,4)-Heptane. Ya.M. Slobodin and M.V. Blinova | 633 | 621 |
| 120. | Cyclohexanone Derivatives of Monoses and Polyhydroxyl Alcohols. V.F. Kazimirova | 637 | 626 |
| 121. | Conversion and Synthesis of Carbohydrates. X. Synthesis of d- and l-Lyxoflavins. V.M. Berezovsky, E.P. Rodionova and L.I. Strelchunas | 639 | 628 |
| 122. | Investigations in the Field of Tautomeric Compounds. XV. Interaction of Phenylmethylpyrazolone with Ketones. A.E. Porai-Koshits and M.S. Dinaburg | 645 | 635 |
| 123. | 2-Alkoxymethyl- and 2-Aryloxymethyl-6-aminobenzthiazoles. S.G. Fridman | 651 | 642 |
| 124. | Direct Iodination of Benzene, Toluene, Chlorobenzene, Iodobenzene and p-Nitrotoluene. A.N. Novikov | 665 | 655 |

— alkylation with olefins, in presence of aluminum chloride, kinetics and mechanism of, 1751;
— catalytic alkylation with butyl alcohol, 1543;
— condensation with 2-methylcyclohexanol and 3-methylcyclopentanol, 257;
— kinetics of alkylation with cyclohexyl chloride, over aluminum chloride, 673;
— system with tetranitromethane, investigation by various physico-chemical methods, 81;
— systems with tetranitromethane, cyclohexane, isooctane and hexadecane, expansion in, 84;
— bromo, formation by reaction of molecular bromine with 1,2-dibromobyclohexene-1, 1015;
— and iodo- and chloro-, iodination, 665;
— isopropyl, relative activity of free radicals in reactions with, 1745;

– 1,2,4-triamino, reaction with carboxylic acids, 1633.
Benzene series, sulfonic acids, hydrolysis of, 1777.
Benzimidazole derivatives, Formation of 1,2-[1',8'-naphthoylene] benzimidazole and its aminosubstituted derivatives, 1993;
– synthesis and properties of, Reaction of 1,2,4-triaminobenzene with carboxylic acids, 1633.
Benzoic acids, 2-amino and 4-butylamino, esters of, see esters.
p-Benzoquinone, see quinone compounds.
Benzothiazole compounds, (2-alkoxymethyl-6-amino and 2-aryloxymethyl-6-amino), preparation, properties, 651;
– hydrolytic cleavage of, 1781;
– synthesis of 5-substituted 6-dimethylamino-2-methyl derivatives, 283.
Biochemistry
Action of acids and of alkalies on chitin, 1731;
Glycerol ethers of chitin, preparation, properties, 2039;
Polymers of amino acids (Preliminary report), 1443;
Synthesis of sulfanilamide derivatives in the lysine series, 695;
The migration of the peptide residue in peptide of serine, 2055.
Bismuth amines, structure and formation in aqueous solutions, 979.
Bismuth ion, complex formation with ions of tartaric acid, 33.
Bisulfite compounds, of furazan compounds, see furazan compounds.
Boric acid, mixed solutions with nickel sulfate, precipitation of nickel from, composition of solid phase, 1871.
Boron, complex compounds of type Me[BAr$_4$], preparation, properties, decomposition, reactions, 1397.
Boron fluoride, as a catalyst in organic chemistry. Alkylation of anisole with pseudo-butylene, 1967.
Bromide, dimethylacetylenylcarbinolmagnesium, reaction with o-salicylaldehyde, 1043.
Bromination, of aromatic compounds, influence of various catalysts upon the direction and rate of, 1593;
– of unsaturated compounds with dioxane dibromide, 619;
– with dioxane dibromide, of aromatic hydrocarbons and heterocycles, 1251.
Butyl alcohol, catalytic alkylation of benzene with, 1543.
n-Butyl alcohol, system with dichloroethane, viscosity of, 803.
n-Butyl alcohol-ethyl alcohol mixture, ketonization of, 987.
Butadiene, and homologs, dibromides, Raman spectra, properties, 453.
Butylene, pseudo, for alkylation of anisole in presence of boron fluoride, 1967.
Butylnaphthalenes, see naphthalenes, butyl.
Butynediol, dimethyldiphenyl, transformation in an acid medium, conversion to 2-methyl-5, 5-diphenylpenten-4-ol-2-one-3, 1363;
– tetramethyl, action of concentrated hydrochloric acid, 2115.
Butyraldehyde, contact conversion to 2-ethylhexen-2-al in presence of Lebedev's catalyst, 2101.

Cadmium nitrate, binary systems with cesium nitrate, thallium nitrate, electrical conductivity of, 2087;
– systems with lithium nitrate and sodium nitrate, conductance in melts, 207.
Camphene, catalytic isomerization over titanium dioxide and activated clay, 563.
ε-Caprolactam, products of reaction with adipic acid, formation, properties, 455.
Carbinol, dimethylvinylethynyl, condensation with ethylene oxide, 2179;
– methylphenylethynyl, preparation, properties, hydrogenation with colloidal palladium in presence of inhibitors, 511.
– nitrobenzothiazolyl, preparation, nitration, 1647.
Carbohydrates, conversion and synthesis of, 639;
– conversion and synthesis of; ketose oxidation, 855.
Carotene synthesis, intermediate products, investigation by infrared absorption spectra, 2193.
Catalyst, aluminosilicate as, in alkylation of benzene with aliphatic alcohols and halogen derivatives, 825;
– aluminum chloride as, mechanism of action, 1751;
– porous nickel as, for hydrogenation of the benzyl ester of cinnamic acid, 833.
Catalysts, (oxides and salts) for the decomposition of hydrogen peroxide, 9;
– used for the isomerization and polymerization of hydrocarbons, nature of, 345;
– various, influence upon the rate and direction of bromination of aromatic compounds, 1593.

Cationic substances, reaction of difficultly soluble salts (oxalates, sulfates and carbonates of calcium, strontium and barium), with, 17.
Cationite SBS, see cationic substances.
Cellulose, cuprammonium solutions of, alcoholate copper atoms in, electrophoresis, ion exchange, 2125.
Cesium nitrate, binary system with cadmium nitrate, electrical conductivity of, 2087.
Cesium phospho-9-molybdates (luteophosphomolybdates), preparation, analysis, solubility, 117.
Chitin, action of acids and alkalies, 1731;
– glycerol ethers of, preparation, properties, 2039.
Chlorides and sulfates of lithium and calcium, reciprocal system of, study by the visual-polythermal method, 1905;
– of sodium and potassium, reversible-adiagonal system of, investigation by the visual-polythermal method, 1509.
Chlorides, sulfates and tungstates of potassium, lithium, quaternary reciprocal system of, physico-chemical investigation, 1695;
– of lithium and potassium, quaternary reciprocal system of, study by the visual-polythermal method, 1287;
– of lithium and potassium, ternary systems of, investigation by fusibility method, 1899.
Chloromycetin (levomycetin), chemistry of. Racemization of L-threo-1-(p-nitrophenyl)-2-(dichloroacetamido)-1,3-propanediol with subsequent conversion of the racemate into chloromycetin (levomycetin), 2045.
Chlorosulfonate, β-chloroethyl, preparation, 1613.
Chromaticity, and extramolecular interactions. Investigation of the absorption spectra of molecular complexes of nitro compounds with aromatic amines, 1385.
Chromatography, molecular. Separation of mixtures of nitrophenols, 1933.
Chromium, complexes with urea, kinetics of aquatization, 53;
– tritartratotetracuproates of, complex cations of, preparation, 975.
Cinnamic acid, benzyl ester, kinetics of hydrogenation over a porous nickel catalyst, 833.
Cinnamic acids and their esters, (propyl), synthesis, properties, oxidation, saponification, 851.
Clay, activated, as catalyst for the isomerization of pinene, camphene and limonene, 563.
Cleavage, hydrolytic, of aryl and alkyl 2-benzothiazolyl sulfones, influence of certain substituents on the relative cleavage rate, 1781.
Cobalt, divalent, complex formation with dimethylglyoxime, 609;
– halides, preparation, thermal stability of, as deduced from reduction with hydrogen, 2063;
– nitrate, system with $Ni(NO_3)_2$-$H_2O$, equilibrium at 20°, 201;
– tartrate complexes of, influence of the acidity of the medium on the composition of, 1167;
– tritartratotetracuproates of, complex cations of, preparation, 975.
Complex compounds. Complexes of divalent iron with dimethylglyoxime, 759;
– Complex salts of N-hydroxyphthalonamide with polyiodides, preparation, composition, 1963;
– formation in solutions of ternary systems, $SbBr_3$-$AlBr_3$-$C_2H_4Br_2$ and $AlBr_3$-$(C_2H_5)_2O$-$C_2H_4Br_2$, 1403;
– in aqueous solutions, factors determining stability of, influence of additives, 1485.
Complex formation between divalent cobalt and dimethylglyoxime, 609;
– between the bismuth ion and the ions of tartaric acid, 33;
– in organic chemistry, comparison of methods of investigation of, 1721;
– of the anion type between potassium and sodium pyrophosphates and oxide salts of the type $MeO''_4$ (Me = Mo, S, Cr, W), 605.
Conductivity, electrical, of the binary systems cesium nitrate-cadmium nitrate, thallium nitrate-cadmium nitrate, and potassium nitrate-rubidium nitrate, 2087;
– of solutions of hydrogen chloride in aqueous dioxane, 2095.
Copper, complex salts with o-monohydroxyazo compounds, preparation, identification, 585;
– complexes of gramicidin, formation, properties, absorption spectra, 1063;
– alcoholate, possibility of formation in cuprammonium solutions of cellulose, 2125;
– halides, thermal stability, enthalpy and entropy of formation of, 1889;
– pyrophosphate complexes, in copper plating baths, composition of, 781.
Corrosive properties of the system nitric acid-acetic acid, 77.
Coumarins, natural, (umbelliferone, osthole, hydroxypeucedanin, xanthotoxol), ultraviolet absorption spectra, 2143.

Cracking, of n-hexadecane in presence of aluminum chloride, 443 ;
– of normal paraffinic hydrocarbons in the presence of aluminum chloride, 225.
o-Cresol, α-oxides of allyl and propenyl derivatives of, preparation, properties, reactions, 809.
Cupric chloride and bromide, compounds with nicotine, preparation, properties, 1665.
Cryoscopy, use in study of complex formation in solutions of ternary systems. $SbBr_3$-$AlBr_3$-$C_2H_4Br_2$ and $AlBr_3$-$(C_2H_5)_2O$-$C_2H_4Br_2$, 1493.
Crystallization from aqueous solutions, distribution of isomorphic and isodimorphic components between the solid and liquid phases during, 27 ;
– distribution of isomorphic and isodimorphic components between the solid and liquid phases during, equilibrium in the system $Co(NO_3)_2$-$Ni(NO_3)_2$-$H_2O$, at 20°, 201.
Cupric salts, of α-hydroxy acids. Tritartratotetracuproates of complex cations of cobalt and chromium, 975.
Cuprothiosulfates, sodium, see sodium.
Cuprous polybromide, as condensing agent for the production of diacetylenic glycols, 1023.
Cyanethylation of acetylenic alcohols and glycols, 157 ;
– of cyclic and heterocyclic alcohols and amines, 165 ;
– of cyclic and heterocycli ketones, reduction and cyclization of the cyanethylation products, 325 ;
– of cyclic α-diketones, 479.
Cyanethylation products of cyclic and heterocyclic alcohols and amines, hydrogenation and alcoholysis of, 165.
Cyanine dyes, see dyestuffs chemistry.
Cyclic hydrocarbons, see hydrocarbons, cyclic.
Cycloheptane, butyl, preparation, properties, contact conversions in presence of platinized charcoal, 1549 ;
– propyl, preparation, properties, contact transformations of, in the presence of platinized carbon, 1343.
Cyclohexadiene-1,3, 2,3-dibromo-, reaction with metallic sodium, 1805.
Cyclohexane, methyl, isomerization over an aluminosilicate catalyst, 1577.
Cyclohexanol, 2-methyl, condensation with benzene, 257.
Cyclohexanone derivatives of monoses and polyhydroxy alcohols, preparation, properties, 637.
Cyclohexene, relative activity of free radicals in reactions with, 1745 ;
– -1, dibromo, reaction with molecular bromine to form bromobenzene, 1015 ;
– -1, 1-phenylethynyl, oxidation with acetyl hydroperoxide, 1201 ;
– -2, 1,4-dibromo-, reaction with metallic sodium, 1617.
Cyclones, reaction with substituted vinyl ethers and esters, 1187.
Cyclopentadiene, characteristic reaction for, (sulfuric acid containing ferric alum), 2171.
Cyclopentanol, preparation, properties, dispersion spectrum, 1621 ;
– 3-methyl, condensation with benzene, 257.
Dehydration, of 3,4,7-trimethyloctyne-5-triol-3,4,7, 1373;
– of N-(β-hydroxyethyl)-arylamines in the presence of alumosilicate, 1429.

Delphinium alkaloids, see alkaloids, delphinium.
Delphinium elatum, see elatine.
Delphinium Elatum L., alkaloids of, see alkaloids.
Delsine, N-alkyl group of, Reactions, 741.
Density of solutions, and the hydrogen bond (densities of organic compounds in benzene and ethyl alcohol), 73.
Diazo compounds, reaction with condensation products of phenylmethylpyrazolone and ketones, 2181 ;
– scission of carbon-carbon bonds under the influence of. Reaction of some tertiary amines of the triphenylmethane series with diazo compounds, 1213 ;
– scission of carbon-carbon bonds under the influence of. Reaction of some tertiary amines of the diphenylmethane series and of dimethylaniline derivatives with diazo compounds, 1219.
Diazo method, for the synthesis of elementoorganic compounds. Synthesis of compounds of group V elements - Organophosphorus compounds. Trichloromethylchlorophosphinic acid and its transformations, 2219.
Diazonium salts, reduction with formaldehyde, 105 ;
– reduction by hypophosphorous acid, 98.
Dichloroethane, systems with methyl alcohol, ethyl alcohol, propyl alcohol, butyl alcohol,

isoamyl alcohols, calcula ion of viscosity of, 801.
Diethylamine, benzyl, reamination of, 1035.
Diethylamino group, mobility of. Reamination of benzyldiethylamine, 1035.
Diisopropylpyrocarbonate, preparation, pyrolysis, properties, 1039.
Diketene, reactions with indole and its oxygen-containing derivatives, 2133;
– condensation with aliphatic ketones (acetone, methylethyl ketone and methylpropyl ketone), 239.
Dimedon, nitro, and its derivatives, preparation, properties, 1827.
Dimethylglyoxime, complexes with divalent iron, composition and properties of, 759 ;
– complex formation with divalent cobalt, 609 ;
– composition of the soluble complex formed with nickel compounds in the presence of oxidants, 1707.
Diphenylethane compounds ; synthesis of nitro, amino, and hydroxy derivatives. Properties, 1653.
Diphenylmethane series, amines of, see amines.
Dioxane, as an aid to bromination and iodination, 1251 ;
– aqueous, electrical conductivity of hydrogen chloride in, 2095 ;
– system with water, heat of dilution of, 1525 ;
– solutions of hydrogen chloride, physico-chemical investigation of, 1911.
Diphenyl, pyridine dye derivatives of, preparation, reactions, quaternary salts, 171.
Diphenylamine carboxylic acids, methods of formation of, 2167.
4-Diphenylamine, derivatives, (glucoside, etc.,), preparation, properties, 2029.
Dipole moments of acridine derivatives, 875 ;
– of sulfanilamide compounds, 869.
Diphenylethane compounds, alkylated diamino derivatives, preparation, properties, 2137.
Dissociation constants, of complex sulfates of rare-earth elements, 1873.
Disulfides as chain transfer agents in the thermal polymerization of styrene, 839.
Dyestuffs Chemistry
Azo dyes from 1,5-aminonaphthol and certain of its derivatives. The hydrogen bond in certain peri-hydroxy azo dyes, 691;
Cyanine dyes. Some tetramethoxythiacarbocyanines, 1999 ;
Extramolecular interactions and chromaticity. Investigation of the absorption spectra of molecular complexes of nitro compounds with aromatic amines, 1385 ;
Investigation in the field of hydroxyfuchsone. Influence of the nitro group and halogens on the indicator properties of derivatives of 3,3'-dimethoxybenzaurin, 351 ;
Investigation in the field of hydroxyfuchsone dyes. Influence of the nitro group and halogens on the color of derivatives of 3,3'-dimethoxybenzaurin, 359 ;

Ethers, β-cyanethyl, of glycols, see glycols;
– cyclic diene, preparation, properties, 243;
– dialkylaminomethylalkyl, transetherification with dialkylaminomethylalkyl sulfides, 1591;
– glycerol, of chitin, preparation, properties, 2039;
– of dimethylvinylethynyl carbinol, preparation, properties, 2179;
– substituted vinyl, action on cyclones, 1187;
– vinyl, polarographic reduction of, 1713;
– vinyl, reaction with aromatic amines to form quinaldine derivatives, 893.
Ethyl acetate, system with titanium terrachloride, viscosity, density and electrical conductivity, 49.
Ethyl alcohol, system with dichloroethane, viscosity of, 802;
– system with water-ammonium difluoride at 25°, solubility in, 765;
– system with water-sodium fluoride at 0 and 25°, solubility in, 769.
Ethyl alcohol-n-butyl alcohol mixture, ketonization of, 987.
Ethylcellulose gels, relation of the elasto-plastic characteristic of, to the sodium ion content in them, 1409.
Ethylene bromide, system with $AlBr_3$-$C_6H_5NO_2$, viscosity, electronconductivity and specific gravities, 1685;

– chlorohydrin, reaction with 2,5-dichloroaniline and aniline, 1587;
– derivatives, disubstituted, mixtures of, hydrogenation, polarographic investigation, 1325;
– derivatives, di- and trisubstituted, mixtures with allyl acetate, hydrogenation, polarographic investigation of, 1315;
– dibromide, systems with $SbBr_3$-$AlBr_3$ and $(C_2H_5)_2O$-$AlBr_3$, complex formation in, study by the cryoscopic method, 1493;
– glycol derivatives, synthesis and transformation of. Production of 2,4-diphenylbuten-3-diol-1,2, 1011;
– glycol derivatives. Synthesis and transformation of symmetrical dimethylphenylphenylacetyleneethylene glycol, 997;
– oxide, condensation with dimethylvinylethynyl carbinol, 2179.
Ethylenes, disubstituted, mixtures with mesityl oxide, polarographic study of hydrogenation of, 2155.
β-Ethylglycidate, ethyl β-methyl, reaction with o- and p-toluidine, 507.
Ethyl glycinate, reaction with chloro derivatives of p-benzoquinone, 539.
2-Ethylhexen-2-al, preparation from butyraldehyde, 2101.
Exchange, of bound radicals by free radicals and ions in solution, 1527.

Ferric oxide, system with $K_2O$-$SO_3$-$H_2O$, physicochemical analysis of, 1463.
Ferric salts, reaction with alkalies, 1463.
Ferrous oxide, thermodynamics of, 37.
Flavins, d- and l-lyxo-, preparation, properties, 639.
Fluorides, sodium and potassium, systems with barium titanate-pyrophosphates of sodium and potassium, surface of crystallization of, 1113.
Formaldehyde, as dimethylating agent for primary aromatic amines, 925;
– condensation with N-methyltryptamine, 737.
Fuchsone derivatives. Influence of the nitro group and halogens on the indicator properties of derivatives of 3,3'-dimethoxybenzaurin, 351.
– Influence of the nitro group and halogens on the color of derivatives of 3,3'-dimethoxybenzaurin, 359.
Furan compounds. Furan and tetrahydrofuran amino alcohols from furfural and β-(α-furyl)-acrolein, 727;
– Naphthofuroxane series. Preparation and properties of 1,2-naphthoquinonedioxime-4-sulfonic acid, 1959;

– Preparation of trimethylfurfurylammonium salts, properties, 2021;
– Synthesis of substituted benzodifurans by the reaction of p-benzo- and toluquinones with acetoacetic ester, 2015;
– tetrahydro, β-alkyl and β-aryl, preparation, properties, 1225;
– tetrahydro compounds, 3,4-diketones of, synthesis and reactions, 191.
Furanidine, 3,4-dimethyl, preparation, conversion to 3,4-dimethylthiophane and 3,4-dimethylpyrrolidine, 1627.
Furanidines, conversion to β-n-amyl- and β-phenylthiophane, 1433.
Furanone, β-tetrahydro, preparation, properties, semicarbazone, reaction with organomagnesium compounds, 1225.
Furazan compounds. Nitration and chlorination of 1,2-naphtho-(3',4')-furazan, 397;
The bisulfite compounds of 1,2-naphtho-(3',4')-furazan and 6-nitro-1,2-naphtho-(3',4')-furazan, preparation, properties, 545.
Furfural, conversion to furan and tetrahydrofuran amino alcohols, 727.

Gleditschia Triacanthos L., alkaloid from, preparation, purification, derivatives, 921.
Glycerin, condensation with aniline over aluminum silicate, 253.
Glycerol, 1,1-pentamethylene, preparation by two methods, 1839.
Glycidol, isopropyl ether, isomerization of, and its reaction with ammonia, 1353.
Glycols, acetylenic, cyanethylation of, 157;
– β-cyanethyl ethers, hydrolysis, alcoholysis, hydrogenation, 337;
– diacetylenic, synthesis in the presence of $Cu_2Br_2$, 1023.
α-Glycols, of the ethylene series, synthesis and transformation. Production of 2,4-diphenylbutene-3-diol-1,2, 1011;
– of the ethylenic series, synthesis and conversion of, 847.
Gramicidin, structure, formation of copper complexes, properties, absorption spectra, 1063.
Gramicidin C, structure of, 1671;
– structure, reduction, analysis, hydrolysis, biuret reaction, 371.

L-Gulonic acid, diacetone-2-keto, acid hydrate, conversion to L-ascorbic acid in alcohol-free organic solvents, 2121.

Halides, as additives for the alkylation of aromatic hydrocarbons with olefins in presence of aluminum, 93;
- β- and α-alkynyl, Grignard-Wurtz reactions with, 1337;
- of cobalt and nickel, preparation, thermal stability of, as deduced from reduction with hydrogen, 2063;
- of metals in the first sub-period of the fourth period of D. I. Mendeleev's system, role of ionization potentials in the thermodynamics of, 2077.

Halogen derivatives, aromatic, condensation with phenylaluminum diiodide, 571;
- as alkylating agents for benzene, 825;
- formation by addition of hydrogen halides to olefins or chloroolefins in presence of a solution of $AlCl_3$ in nitrobenzene, 1925;
- of the aromatic series, catalytic transformation of. Mechanism of isomerization of the monohalogen derivatives of naphthalene, 1929.

Halogenites, alkylhypo, order of addition to 3-chloro-and 3-bromohexadiene-1,3, 1003.

Halogens, conjugated addition reactions with olefins, mehcanism of, 1607;
- order of addition to unsymmetrical olefins, 1825;
- reaction with aromatic isocyanates, 197.

Heat capacity, method for investigation of the structural changes in iron-nickel-aluminum alloys, 785;
- molecular, of organic compounds of various degrees of hydrogenation, use in evaluation of structure and natural oscillations of molecules, 1915.

Heat of dilution, of dioxan and water, 1525.

Heat of formation of chemical compounds and the position of the elements in the D. I. Mendeleev periodic table, 753;
- of $PbCl_4$ from $PbCl_2$ and gaseous chlorine, thermal effect of lead tetrachloride dissolution in carbon tetrachloride, 1677.

Heptadiene-1,3 and -2,4, formation from a mixture of n-butyl alcohol and acetone, 1763.

n-Heptane, cracking in presence of aluminum chloride, 225.

Heptane, spiro-(2,4)-, preparation, properties, dispersion spectrum, 633.

Heptathionic acid, prearation, 793.

Heterocyclic compounds, bromination with dioxane dibromide, 1251.

n-Hexadecane, cracking in presence of aluminum chloride, 443.

Hexadiene-1,3, 3-chloro- and 3-bromo-, order of addition of alkylhypohalogenites, 1003.

Hexathionic acid, preparation, sulfurization, 793.

High Polymer Chemistry
Hydrolysis, alcoholysis and hydrogenation of β-cyanethyl esters of glycols, 337;
Mercaptans and disulfides as chain transfer agents in the thermal polymerization of styrene, 839;
Polymerization of some unsaturated esters of phosphonocarboxylic acids, 1819;
Polymers of amino acids. (Preliminary report), 1443;
The process of formation of polyamide resins. The stepwise character of the process of formation of polyamide resins and the products of reaction of ε-caprolactam with adipic acid, 455;
The role of the oxidation-reduction properties of α-hydroxy ketones in initiated polymerization, 463.

Hydrazide, cyclic, of maleic acid, see maleic acid.

Hydrocarbons, acetylenic, reaction with phosphorus trichloride and oxygen, 391;
- allene, preparation, properties, oxidation by acetyl hydrogen peroxide, 1601;
- aromatic, alkylation with olefins in the presence of metallic aluminum and halogen derivatives, 93;
- aromatic, bromination with dioxane dibromide, 1251; 1251;
- aromatic, formation from hydroaromatic aldehydes and ketones by dehydration, 301;
- condensed aromatic, (naphthalene, anthracene, chrysene and hydro derivatives), hydrogenation rates in presence of tungsten disulfide, 1771;
- cyclic. Synthesis of cyclohexene and cyclohexane hydrocarbons with a quaternary carbon atom, based upon 1,3-dimethylcyclohexadiene-1,3, 1537;
- diene (divinyl, diisopropenyl, cyclopentadiene, cyclohexadiene), condensation with propargyl aldehyde, 2107;

– nature of the catalysts for isomerization and polymerization of, 345;
– normal paraffinic, cracking in presence of aluminum chloride, 443;
– of the divinyl series, catalytic formation from alcohols, 1763;
– paraffinic, cracking in the presence of aluminum chloride, 225;
– reaction with nitrobenzene, 993;
– unsaturated, the problem of causes of inhibition of synthesis of carboxylic acids by the catalytic oxidation of, 615;
– unsaturated cyclic, and their halogen derivatives. Action of metallic sodium on 2,3-dibromo-1,3-cyclohexadiene, 1805;
– unsaturated cyclic, and their halogen derivatives, investigation of, 1617;
– unsaturated cyclic, and their halogen derivatives, reactions of, 1015;
– vinylacetylene, oxidation with organic hydroperoxides. Oxidation of 3,6-dimethyl-2,6-octadien-4-yne with acetyl hydroperoxide (peroxyacetic acid), 1801;
– vinylacetylenic, oxidation with organic hydroperoxides, 1201.

Hydrogenation, destructive, of tetraethylsilane, 273;
– of acetylenedicarboxylic acid, polarographic investigation of, 63;
– of cyanethylation products of cyclic and heterocyclic alcohols and amines, 165;
– of methylphenylethynylcarbinol, with colloidal platinum in presence of inhibitors, 511;
– process, polarographic investigation of. Hydrogenation of mixtures of disubstituted ethylene derivatives, 1325;
– process, polarographic study of. Hydrogenation of mixtures of mesityl oxide with disubstituted ethylenes, 2155;
– processes, polarographic investigation of. Hydrogenation of allyl acetate mixtures with di- and trisubstituted ethylene derivatives, 1315;
– rates of condensed aromatic hydrocarbons (naphthalene, anthracene, chrysene and hydro derivatives), in presence of tungsten disulfide, 1771.

Hydrochloric acid, concentrated, action on tetramethylbutyne diol, 2115.

Hydrocyanic acid, α-hydroxyisobutyronitrile as a source of, in addition reactions, 475.

Hydrogen atom, migration routes of, during oxidation-reduction reactions, 95, 105.

Hydrogen atoms, in the products of condensation of phenylmethylpyrazolone with ketones, lability of, 1209;
– mobility in phenazohydrin bonds, 1739.

Hydrogen bond and the density of solutions (densities of organic compounds in benzene and ethyl alcohol), 73;
– and the physical properties of 8-hydroxy, and 8-methoxyquinolines, 575;
– and the viscosity of solutions (in benzene and ethyl alcohol), 203;
– in certain peri-hydroxy azo dyes, 691.

Hydrogen chloride, dioxane solutions of, physicochemical investigation, 1911;
– solutions in aqueous dioxane, electrical conductivity of, 2095.

Hydrogen exchange, mechanism of, and of some protolytic reactions in solutions, 421.

Hydrogen halides, addition to unsaturated compounds for the production of halogen derivatives, 1925;
– exchange reactions in the interaction of halogenated naphthalenes with, 1755.

Hydrogen peroxide, catalysts of the decomposition of, 9.

Hydrogen sulfide, action on esters of arsenous acid, 1191;
– reaction with α-oxides of the acetylene series, 1017.

Hypobromous acid, order of addition to vinylacetylenes, 805.

Hypophosphorous acid, reaction with iodine chloride and iodine trichloride, 1;
– reduction of diazonium salts by, 98.

Imidazole derivatives. Bromination of 1,2-naphthimidazole, 497;
– Oxidation of 1,2-naphthimidazole, 517;
– Preparation of 4(or 5)-imidazolylmethyl esters of 4-amino and 4-butylaminobenzoic acids, properties, local anaesthetic action, 1831.

Imidazolones, pyrimidino, preparation, properties, 1045.

Indandione-1,3-, color of merocyanin dyes which are derivatives of, 719;
– 2-nitro-, reaction with alcohols, 733.

Indicators, derivatives of 3,3'-dimethoxybenzaurin, as, influence of nitro group and halogens, 351.

Indole, and oxygen-containing derivatives, preparation, properties, reaction with diketene, 2133.

Indole compounds, synthesis. Reaction of the ethyl ester of β,β'-diethyl- and the ethyl ester of β,β'-dipropylglycidic acid with aniline, 2117.
Inhibitors for hydrogenation of methyl-phenylethynyl carbinol, 511;
– (oxidation), mechanism of action of, 1581.
Iodates, of alkali metals, reactions in solutions with zirconium nitrate, 1109, 1263, 1863.
Iodides, alkyl, action on esters of phenylalkylarsenious acids, 2009.
Iodination, direct, of benzene, toluene, chlorobenzene, iodobenzene and p-nitrotoluene, 665;
– with the help of the complex of iodine chloride and dioxane, 1251.
Iodine, system with naphthalene-mercuric bromide, cryoscopic investigation of, 931;
– chloride, and trichloride, reaction with hypophosphorous acid, 1.
Ion exchange in alcohol-water and acetone-water solutions, 957.
Ionization potentials, role of, in the thermodynamics of the halides of metals of the first sub-period of the fourth period of D. I. Mendeleev's system, 2077.
Ions, metallic, effect on the properties of ethylcellulose, 1409.
Iron, divalent, complexes with dimethylglyoxime, composition and properties of, 795;
– system with sulfur, thermodynamic properties of, 797.
Isoamyl alcohol, system with dichloroethane, viscosity of, 803.
Isobaric potentials of difficultly-soluble oxide hydrates and basic salts and the pH of the solutions in equilibrium with the solid phase, 935.
Isobutyronitrile, α-hydroxy, as a source of hydrocyanic acid in addition reactions, 475.
Isocyanates, aromatic, reaction with halogens, 177;
– organic. Transformation of phenyl- and 1-naphthylisothiocyanates by treatment with aluminum chloride, 1835.
Isomerism of the monochloronaphthalenes, 667.
Isomerization, catalytic, of pinene, camphene and limonene over titanium dioxide and activated clay, 563;
– catalytic, of pinene and limonene by titanic acid, 1437;
– contact, in presence of platinized carbon, of propylcycloheptane, 1343;
– of bicylic terpene oxides during reaction with acetic anhydride, 1237;
– of α-hydroxyaldehydes, 467;
– of the isopropyl ether of glycidol and its reaction with ammonia, 1353;
– of methylcyclohexane over an aluminosilicate catalyst, 1577;
– of mono-halogen derivatives of naphthalene, mechanism of, 1929;
– of the α-oxides of the acetylene and vinylacetylene series, 1357.
Isonicotinic acid, preparation, 1631.
Isotopes. Comments on exceptions to the Shchukarev-Mattaukh law, 929.
Ivanov, Evgeny Alekseevich, obituary notice, 593.

Ketones (acetone, methylethyl ketone, methylpropyl ketone), condensation with diketene, 239;
– condensation with phenylmethylthylpyrazolone, lability of hydrogen atoms in products, 1209;
– reaction with diafkylphosphorous acids, 121, 315;
– reaction with phenylmethylpyrazolone, 645;
– α-bromo, anomalous reactions of. Reaction of sodium phenolate with α-bromo-ethyl phenylketone, 1785;
– cyanoethylated, in the synthesis of unsaturated δ-lactones, 1423;
– cyclic and heterocyclic, cyanethylation of, 325;
– 3,4-di, of the tetrahydrofuran series, synthesis and reactions, 191;
– α-di, cyclic, cyanoethylation of, 479;
– α-halogeno- and α-hydroxy-, with a primary alcoholic group, isomeric transformations of, 467;
– hydroaromatic, conversion into aromatic hydrocarbons by dehydration, 301;
– α-hydroxy, oxidation-reduction properties of, in initiated polymerization, 463;
– methyl, condensation products with phenylmethylpyrazolone, reaction with diazo compounds, 2181;
– methyl butyl, and methyl ethyl, preparation, properties, 983;
– methyl, ethyl, methyl-n-butyl, methylisobutyl, catalytic synthesis of, 1163;
– mixed, catalytic production from primary alcohols, 987;

– mixed, catalytic production from primary alcohols (n-butyl and isoamyl), 1347;
– mixed, preparation from a mixture of ethyl and isoamyl alcohols, 1159;
– polycyclic, hydroaromatic, synthesis, 1809;
– unsaturated, addition of the esters of ethylphosphinous acid, dialkylphosphorous and dialkylthiophosphorous acids, 1025.
Ketose, (l-sorbose), kinetics of cleavage oxidation, 855.
Kinetics of formation of l-ascorbic acid from the hydrate of diacetone-2-keto-l-gulonic acid, in an aqueous medium, 1403.

Lactams, alkoxyethylidene, preparation, properties, 1563.
β-Lactones and β-lactono acids, Benzalmalono-β-lactone, preparation, 1817.
δ-Lactones, unsaturated, cyanoethylated ketones in the synthesis of. δ-Lactone from γ-acetylvaleronitrile, synthesis and properties, 1423.
Lead chloride, reaction with chlorine to form lead tetrachloride, 1677;
– titanate, reaction with salts in melts, (fluorides, silicates, pyrophosphates, molybdates, tungstates and carbonates of sodium and potassium), 211;
– tetrachloride, heat of formation from $PbCl_2$ and $Cl_2$, thermal effect of dissolution in carbon tetrachloride, 1677.
Leontice Ewersmannii Bge., see alkaloids.
Lepidine and derivatives, synthesis from acetylated arylamines, 319.
Levomycetin, see chloromycetin.
Limonene, catalytic isomerization by titanic acid, 1437;
– catalytic isomerization over titanium dioxide and activated clay, 563.
Lithium nitrate, system with cadmium nitrate, conductance in melts, 207.
Lithium stibide, enthalpy of formation of, 1887.
Lysine, sulfanilamide derivatives, synthesis, derivatives, 695.

Magnesium, behavior in alkaline solutions, 215;
– behavior in potassium dichromate solutions, influence of "activating" salts, 1673;
– hydroxide, experimental determination of the equilibrium constant of the reaction of decomposition of, 1129;
– organo compounds, reaction with methyl acrylate, 1195;
– sulfate, binary system with rubidium sulfate, study by the thermal analysis method, 1285.
Maleic acid, cyclic hydrazide of, and derivatives, preparation, 1205;
– system with acetylenedicarboxylic acid-succinic acid, composition diagrams for, 68.
Manganese triacetate, as oxidizing agent for tertiary α-keto alcohols, 815.
Markovnikov, V. V., the development of the theory of chemical structure in the works of, 50th anniversary of his death, 403.

Polymers (rubber solutions), relative activity of free radicals in reactions with, 1745.
Polythionates, study of reactions of, with the aid of labeled sulfur, trithionates, 1137.
Potassium bromide, system with $AlBr_3$-nitro-

benzene, specific gravity, viscosity and cryoscopy of, 1517.
Potassium dichromate solutions, behavior of magnesium in, influence of "activating" salts, 1673.
Potassium hydroxide, anhydrous, reaction with acetone, 1157.
Potassium nitrate, binary system with rubidium nitrate, electrical conductivity of, 2087.
Potassium oxide, system with $Fe_2O_3$-$SO_3$-$H_2O$, physico-chemical analysis of, 1463.
Potassium pyrosulfate, system with vanadium pentoxide, thermographic and roentgenographic investigations, 25.
Potassium sulfate, system with vanadium pentoxide, thermographic and roentgenographic investigations, 21.
Potentiometric Analysis
Thiosulfate complexes of mercury, 429.
Propargyl aldehyde, condensation with diene hydrocarbons (divinyl, diisopropenyl, cyclopentadiene, cyclohexadiene), 2107.
Propionic acid derivatives, alkamine esters of β-(4-hydroxyphenyl)-α-phenylpropionic acid, preparation, properties, 701.
Propyl alcohol, system with dichloroethane, viscosity of, 802.
Protein molecule, carboxylic anhydrides of amino acids as structural fragments in, 367;
– (gelatin, albumin, casein, edestin, gramicidin), number of linear and amino acid bonds in, 577.
Proteins, microstructure of. Behavior of diacetyldiketopiperazine in its reactions with amines, 2201.
Pyrazolone, phenylmethyl, condensation with ketones, lability of hydrogen atoms in products, 1209;
– condensation products with methyl ketones, reaction with diazo compounds, 2181;
– reaction with ketones, 645.
Pyridine, dye derivatives of diphenyl, preparation, reactions, quaternary salts, 171;
– α-formyl, preparation, 1631;
– sulfotrioxide, as sulfonating agent for anabasine, 917.
Pyrimidine derivatives, sulfonation of, with chlorosulfonic acid, 2185.
Pyrimidinoimidazolones, see imidazolones, pyrimidino.
Pyrophosphates, of potassium and sodium, complex formation of the anion type with oxide salts of the type $MeO'_4$ (Me = S, Mo, Cr, W), 605;
– of sodium and potassium, systems with barium titanate-fluorides of sodium and potassium, surface of crystallization of, 1113;
– tungstates, of sodium and potassium, complex formation and double decomposition in a reciprocal system of, 941.
Pyrrolidine, 3,4-dimethyl, preparation, properties, 1627.

Quaternary ammonium compounds. Alkylated diamino derivatives of the diphenylethane series, preparation, properties, 2137;
– Preparation and properties of trimethylfurfurylammonium salts, 2021.
Quaternary ammonium salts, use in alkylation in a water medium, 1851.
Quinaldine, preparation, properties, 8-methyl, 6-nitro-, derivatives, 127;
– derivatives, preparation from aromatic amines and and vinyl ethers, 893.
Quinoline compounds, esters of α-hydroxy-(6-quinolyl) methylphosphinic acid, preparation, properties, 315;
– compounds, preparation, synthesis of lepidine and its derivatives from acetylated arylamines, 319;
– derivatives, synthesis from diethylidenearylamines, 127.
Quinoline, 8-hydroxy, interaction with organic acid anhydrides, physico-chemical analysis of reaction, 1533;
– study of reaction with organic acids by the methods of physico-chemical analysis, 87;
– 8-methoxy, the physical properties and the hydrogen bond of, 575.
Quinoline, 2-(p-methylphenyl)-, and derivatives, catalytic synthesis of, 323.
Quinone compounds. Condensation of p-benzoquinone with sulfanilamides, 711;
– Reaction of methoxyquinones with amines, 715;
– Synthesis of chloro- and bromo-substituted hydroquinones by the action of ether solutions of hydrogen chloride and bromide on quinones, 1415.
Quinones, condensation of p-benzoquinone with α-amino acids, 533;
– reaction of chloro derivatives of p-benzoquinone with ethyl glycinate, 539;
– p-benzo- and tolu-, reaction with acetoacetic ester, to form substituted benzodifurans, 2015;
– (p-benzo-, tolu-, p- and m-xylo-, α- and β-naphtho-,), sulfonation, 1049.

Quinuclidines, 2-aminomethyl, substituted, preparation, properties, 1641;
– substituted 2-aminomethyl-3-(β-hydroxyethyl)-, preparation, properties, 2189.

Radicals, bound, exchange for free radicals (phenyl, ethyl and methyl labeled with deuterium) and ions (positive phenyl) in solution, 1527;
– (ethyl, methyl, phenyl), exchange between organic compounds in solution, study by the isotopic method, 1303;
– free, relative activity of, in reactions with isopropylbenzene, cyclohexene and polymers, 1745.
Radioactivity, artificial, twentieth anniversary of the discovery of, 1859.
Rare-earth elements, solubility products of oxalates of and dissociation constants of their complex sulfates, 1873.
Reaction, Gustavson-Friedel-Crafts, use of antimony pentachloride in, 501;
– Reformatsky, with bromomalonic ester, preparation of benzalmalono-β-lactone, 1817.
Reactions, Grignard-Wurtz, with β- and γ-alkynyl halides, 1337;
– protolytic, in solution and mechanism of hydrogen exchange, 421.
Rearrangement, Arbuzov, of α,β-dibromodiethyl ether and phosphites, mechanism of, 1789.
Reduction of γ-dinitriles by Vyshnegradsky's method, 295.
Rhodanine, compounds obtained by substitution in the thio ketone (thiono) group, preparation, properties, antitubercular activity, 1975.
Rubidium nitrate, binary system with potassium nitrate, electrical conductivity of, 2087.
Rubidium phospho-9-molybdates (luteophosphomolybdates), preparation, analysis, solubility, 1117.
Rubidium sulfate, binary system with magnesium sulfate, study by the thermal analysis method, 1285.

o-Salicylaldehyde, reaction with dimethylacetylenylcarbinolmagnesium bromide, 1043.
Saligenin, 5-nitro, and its ethers, preparation, properties, 2035.
Salts, reaction with barium titanate in melts, 219;
– basic, sparingly-soluble, isobaric potentials of formation of, and pH of the solutions in equilibrium with the solid phase, 935;
– difficultly soluble, (oxalates, sulfates and carbonates of calcium, strontium and barium), reaction with cationic substances, 17;
– sodium, of fatty acids, binary systems with sodium nitrate and thiocyanate, investigation of liquidus curve of, 1145.
Serine, migration of the acylaminoacyl(peptide) residue in peptide derivatives of serine, 2055.
Shchukarev-Mattaukh law, comments on exceptions to, 929.
Schoenite (picromerite), type, double salt components, systems with, equilibrium data for, 27.
Silane, tetraethyl, preparation, properties, destructive hydrogenation, refractive indices of mixtures with triethylsilane, 273;
– triethyl, reaction with ammonia, amines, 687.
Silanes, acylhydroxy, in the synthesis of keto acids of the aromatic series, 1555;
– rhodano-substituted (isothiocyanate-substituted), preparation, properties, 1079;
– tetraisobutyl-, tetraisopropyl-, tetracyclohexyl-, tetra-α-naphthyl-, preparation, properties, 1179;
– trialkyl, reaction with alcohols, Synthesis and physical properties of trialkylalkoxysilanes, 1169;
– trialkyl, reciprocal reaction with monocarboxylic acids, 859;
– trialkylacyloxy, new method of synthesis and physical properties, 859.
Silazane, hexaphenyldi- and hexa-p-tolyldi-, synthesis and properties, 867.
Silicon acids, complex, Silicomolybdovanadic, preparation, composition, 971.
Silicon organic compounds, containing oxygen. Preparation of trimethyl- and triethyl silanols and their transformations, 2175.
Silver anodic deposits, composition and structure of, 1475.
Silver molybdate, systems with sodium molybdate and silver sulfate, crystallization of, 435.
β-Sitosterol, isolation from crude phytosterol and its analysis, 549.
Sodium, reaction with barium titanates in melts, 219;
– metallic, action on 2,3-dibromo-1,3-cyclohexadiene, 1805;
– metallic, reaction with 1,4-dibromocyclohexene-2, 1617;
– chloride, interaction with molybdenum compounds, 1879;
– cuprothiosulfates, preparation, 1105;

– dibutylthiophosphite, action of alkyl halides and allyl bromide, 311;
– fluoride, system with water–ethyl alcohol at 0 and 25°, solubility in, 769;
– nitrate, binary systems with the sodium salts of fatty acids, liquidus curves of, 1145;
– nitrate, system with cadmium nitrate, conductance in melts, 207;
– phenolate, reaction with α-bromoethyl phenyl ketone, 1785;
– thiocyanate, binary systems with sodium salts of fatty acids, liquidus curves of, 1145.
Solubility in the system water-ethyl alcohol-ammonium difluoride at 25°, 765;
– in the system water-ethyl alcohol-sodium fluoride at 0 and 25°, 769;
– products of the oxalates of some rare-earth elements and the dissociation constants of their complex sulfates, 1873.
Solutions, alcohol-water, acetone-water, ion exchange in, 957;
– non-aqueous. The system naphthalene-iodine-mercuric bromide, cryoscopic study, 931.
Sophora Pachycarpa, see alkaloids.
Spectra, absorption, of molecular complexes of nitro compounds with aromatic amines, 1385;
– absorption, of tetranitromethane, alone, and in mixtures with benzene, 85;
– infrared, of sulfonic acids of 2-amino-4-methylthiazole, clarification of structure with the aid of, 553;
– infrared absorption, application to investigation of the intermediate products of vitamin A and carotene synthesis (ionones), 2193;
– ultraviolet, of natural coumarins, 2143.
Stability, thermal, of copper halides, 1889;
– of symmetrical aromatic compounds of mercury with phenols, 2147.
Steric hindrance and properties of certain arylaminonaphthoquinones, 183.
Strontium metaniobate and its hydrates, preparation, properties, 1883.
Structure, chemical, development of the theory of, in the works of V. V. Markovnikov, 403.
Styrene, mercaptans and disulfides as chain transfer agents in the thermal polymerization of, 839;
– nitro, reaction with some compounds containing methylene groups activated by carbonyl and carboxyl groups, 523.
Succinic acid, system with acetylenedicarboxylic-maleic acids, composition diagrams for, 68.
Sulfanilamide compounds, dipole moments and structure, 869;
– derivatives in the lysine series, synthesis, derivatives, 695;
– condensation with p-benzoquinone, 711.
Sulfates and chlorides of lithium and calcium, reciprocal system of, study by the visual-polythermal method, 1905;
– and chlorides of sodium and potassium, reversible-adiagonal system of, investigation by the polythermal method, 1509;
– chlorides and tungstates of lithium, potassium, quaternary reciprocal system of, physico-chemical investigation, 1695;
– chlorides and tungstates of lithium and potassium, ternary systems of, investigation by the fusibility method, 1899;
– chlorides, tungstates, of lithium and potassium, quaternary reciprocal system of, study by the visual-polythermal method, 1287;
– and molybdates of sodium and silver, reciprocal system of, crystallization, 435;
– β-chloroethyl, preparation, properties, 1613;
– of lithium and potassium, ternary reciprocal system with molybdates of lithium and potassium, surface of crystallization of, 1121;
– of lithium, sodium and potassium, ternary system of, investigation by the melting point method, 1499.
Sulfides, dialkylaminomethylalkyl, transetherification with dialkylaminomethylalkyl ethers, 1591;
– phenyltrifluoromethyl, with substituents in the para position, preparation, properties, 885.
Sulfochloride, β-chloroethane, preparation, reaction with aromatic amines, 1379.
Sulfonaryls, tribromophosphazo, preparation, properties, 119.
Sulfonation, of N-acetyl- and N-methylanabasine with sulfuric acid, 1847;
– of pyrimidine derivatives, with chlorosulfonic acid, 2185;
– reaction. Hydrolysis of sulfonic acids of the benzene series, 1777.
Sulfones, aryl and alkyl 2-benzothiazolyl, hydrolytic cleavage of, influence of certain substituents on the relative cleavage rate, 1781;
– phenyltrifluoromethyl, with substituents in the para position, preparation, properties, 885.
Sulfonic acid, p-hydroxybenzene, derivatives, preparation, properties, 2017.
Sulfonic acids, alkano. Interaction of alkano-

sulfonyl chlorides with p-chloroaniline and p-nitroaniline, 629;
– of 2-amino-4-methylthiazole, clarification of structure with the aid of infrared spectra, 553;
– of benzene series, see benzene.
Sulfonyl chlorides, alkano, reaction with p-chloroaniline and p-nitroaniline, 629.
Sulfur, labeled, study of the reactions of polythionates with, trithionates, 1137;
– thermodynamic properties of, in liquid iron-sulfur alloys saturated with carbon, 797;
– trioxide, system with $K_2O$-$Fe_2O_3$-$H_2O$, physico-chemical analysis of, 1463.
System, acetic anhydride-nitric acid, density, viscosity, refractive index of, 1151;
– $AlBr_3$-$C_5H_5NO_2$-$C_2H_4Br_2$, viscosity, electroconductivity, and specific gravities, 1685;
– aluminum chloride-acetamide-water, physico-chemical analysis of (specific gravity, viscosity, cryoscopy, electrical conductivity), 43;
– $SbBr_3$-$AlBr_3$-$C_2H_4Br_2$, complex formation in. Study by the cryoscopic method, 1493;
– barium-phosphorus, formation of higher barium phosphides, 1261;
– binary, rubidium sulfate-magnesium sulfate, study by the thermal analysis method, 1285;
– $Co(NO_3)_2$-$Ni(NO_3)_2$-$H_2O$, equilibrium at 20°, 201;
– dioxane-water, heat of dilution of, 1525;
– iron-sulfur, properties of, 797;
– lithium nitrate-cadmium nitrate, in melts, conductance of, 207;
– naphthalene-iodine-mercuric bromide, cryoscopic investigation of, 931;
– nitric acid-acetic acid, specific gravities, atomic concentration and corrosive properties, 77;
– KBr-$AlBr_3$-nitrobenzene, physico-chemical investigation of (specific gravity, viscosity and cryoscopy), 1517;
– $K_2O$-$Fe_2O_3$-$SO_3$-$H_2O$, physico-chemical analysis of, 1463;
– quaternary reciprocal, of lithium and potassium chlorides, sulfates and tungstates, study by the visual-polythermal method, 1287;
– quaternary reciprocal, of lithium, potassium chlorides chlorides, sulfates and tungstates, physico-chemical data, 1695;
– reciprocal, of the chlorides and sulfates of lithium and calcium, investigation by the visual-polythermal method, 1905;
– reciprocal, of sodium and potassium pyrophosphates and tungstates, complex formation and double decomposition in, 941;
– reciprocal, of the sulfates and molybdates of sodium and silver in melts, 435;
– reversible-adiagonal, of sodium and potassium chlorides and sulfates, investigation by the visual-polythermal method, 1509;
– sodium nitrate-cadmium nitrate, in melts, conductance of, 207;
– succinic, acetylenedicarboxylic, maleic acids, composition diagrams for, 68;
– ternary, of lithium, sodium and potassium sulfates, investigation by the melting point method, 1499;
– ternary reciprocal, of the adiagonal-belt type composed of the sulfates and molybdates of lithium and potassium, 1121;
– tetranitromethane-benzene, investigation by various physico-chemical analytical methods, 81;
– titanium tetrachloride-ethyl acetate, physico-chemical investigation of, (viscosity, density, electrical conductivity), 49;
– vanadium pentoxide-potassium sulfate, thermographic and roentgenographic investigations, 21;
– water-ethyl alcohol-ammonium difluoride at 25°, solubility in, 765;
– water-ethyl alcohol-sodium fluoride, at 0 and 25°, solubility in, 769.
Systems, barium titanate with fluorides, silicates, carbonates, pyro- and meta-phosphates, metaborates, chlorides, molybdates, sulfates, tungstates of the alkaline and certain divalent metals, fusion diagrams, 219;
– barium titanate-fluorides and pyrophosphates of sodium and potassium, surface of crystallization of, 1113;
– binary, cesium nitrate-cadmium nitrate, thallium nitrate-cadmium nitrate, and potassium nitrate-rubidium nitrate, electrical conductivity of, 2087;
– binary, formed by the sodium salts of fatty acids with sodium nitrate and thiocyanate, investigation of liquidus curve of, 1145;
– binary, formed by urea with phenols, physico-chemical analysis of, 1309;
– binary, of sodium and potassium pyrophosphates with tungstates, chromates and molybdates of sodium and potassium, complex formation in, 605;

– binary, of sodium salts of carboxylic acids, physico-chemical analysis by the visual-polythermal method, 1567;
– binary, viscosity, calculation of, 801;
– complex-forming, in organic chemistry, comparison of methods of investigation of, 1721;
– conjugated. Condensation of diene hydrocarbons with propargyl aldehyde, 2107;
– conjugated, investigations in the field of. Order of addition of hypobromous acid to vinylacetylenes and properties of α-oxides of vinylacetylenes, 805;
– conjugated. Order of addition of the alkylhypohalogenites to 3-chloro- and 3-bromohexadiene-1,3, 1003;
– dichloroethane-methyl alcohol, -ethyl alcohol, -propyl alcohol, -butyl alcohol, -isoamyl alcohol, viscosity of, 801;
– 8-hydroxyquinoline-acetic, benzoic, monochloroacetic, salicylic, p-hydroxybenzoic, p-nitrobenzoic, cinnamic, and hydrocinnamic acids, physico-chemical properties of, 87;
– 8-hydroxyquinoline-organic acid anhydrides (acetic, benzoic, phthalyl), physico-chemical analysis of, 1533;
– ternary, of the chlorides, sulfates and tungstates of lithium and potassium, investigation by fusibility method, 1899;
– ternary, use of cryoscopy in study of complex formation in, 1493;
– with schoenite (picromerite) type double salt components, equilibrium data, 27.

Tantalates, of alkali earth metals (calcium, strontium, barium), preparation, analysis, specific conductance, 1267;
– preparation, analysis, specific electrical conductivity, 1481.
Tartaric acid ions, complex formation with the bismuth ion, 33.
Tartrate complexes of cobalt, influence of the acidity of the medium on the composition of, 1167.
Taspine, decomposition products, composition, 2215.
Tautomeric compounds, investigations in the field of, 645;
– investigations on. Lability of the hydrogen atoms in the products of condensation of phenylmethylpyrazolone with ketones, 1209;
– The reaction of diazo compounds with condensation products of phenylmethylpyrazolone and ketones, 2181.
Terpene oxides, bicyclic (α-pinene, $\Delta^3$-carene, camphene), isomerization during reaction with acetic anhydride, 1237.
Terpinenes, mechanism of formation by catalytic isomerization of pinene and limonene by titanic acid, 1437.
Terpinolene, mechanism of formation by catalytic isomerization of pinene and limonene by titanic acid, 1437.
Textile Chemistry
Chemistry of cuprammonium solutions of cellulose. Alcoholate copper atoms in, 2125.
Thallium nitrate, binary system with cadmium nitrate, electrical conductivity of, 2087.
Thermodynamics of ferrous oxide, 37.
Thiadiazoles, preparation, reduction to the corresponding thiosemicarbazones, with ring opening, 1989.
Thiazole compounds. 4-Alkoxymethyl- and 4-aryloxymethyl-2-(p-aminophenyl)-thiazoles, preparation, 909;
– derivatives, synthesis. Nitrobenzothiazolylcarbinols and their conversion, 1645;
– 2-amino-4-methyl, clarification of structure of sulfonic acids of, with the help of infrared spectra, 553.
Thiazoles, 2-alkoxymethyl- and 2-aryloxymethyl-4(p-aminophenyl), preparation, properties, 1057.
Thiazolidine derivatives, preparation, properties, antitubercular activity, 1975.
Thiocarbazone derivatives, asymmetrical, synthesis and properties of, 1623.
Thiophane, β-n-amyl- and β-phenyl-, production by catalytic conversion of the corresponding furanidines, 1433;
– 3,4-dimethyl, preparation, properties, 1627.
Thiophene compounds, preparation, by reacting α-oxides of the acetylene series with hydrogen sulfide, 1017.
Thiosulfate complexes, of mercury, potentiometric investigations of, 429.
Thiourea, complexes with metals, determination of composition and instability constants by a polarographic method, 59.
Tin, and chlorides, reaction with acyl peroxides, 265.
Titanic acid, as catalyst for formation of

terpinolene and terpinenes by isomerization of pinene and limonene, 1437;
– as catalyst for the isomerization of pinene, 345.
Titanium dioxide, as catalyst for the isomerization of pinene, camphene and limonene, 563.
Titanium tetrachloride, system with ethyl acetate, viscosity, density and electrical conductivity, 49.
Toluene, nitration in the presence of mercury salts, 2005;
– and p-nitro, iodination, 665.
o-Toluidine, N-(β-hydroxyethyl), behavior in the presence of aluminosilicate, 679.
Toluidine, o- and p-, reaction with ethyl-β--methyl-β-ethylglycidate, 507.
Triazine derivatives, synthesis, properties, thermal decomposition in isopropylbenzene, cyclohexene and solutions of rubber, 1745.
Triphenylmethane series, amines of, see amines.
Tryptamine, N-methyl, condensation with formaldehyde, 737.
Tungstates, chlorides, sulfates, of lithium, potassium, quaternary reciprocal system of, physico-chemical investigation, 1695;
– chlorides, sulfates, of lithium and potassium, quaternary reciprocal system of, study by the visual-polythermal method, 1287;
– chlorides and sulfates of lithium and potassium, ternary systems of, investigation by the fusibility method, 1899;
– pyrophosphates, sodium and potassium, complex formation and double decomposition in a reciprocal system of, 941.

Unsaturated compounds, bromination with dioxan dibromide, 619.
Uracil, 4,5-di-(acetylamino), action of mineral acids, 145.
Urea, complexes with chromium, kinetics of aquatization, 53;
– systems with phenols, physico-chemical analysis of, 1309;
– diaryl, and dinitro derivatives, conversion to p-nitro-o-anisidine, 707.
Ureido acids, see acids.
Uric acid, conversion into 8-methylxanthine, 145;
– conversion into 8-methylxanthine, structure of the intermediate substance, 135.

Vanadium pentoxide, systems with potassium sulfate and potassium persulfate, thermographic and roentgenographic investigations, 21.
Vanadyl chloride solution, pure, preparation, 441.
Vinylacetylene, homologs, cyclic diene ethers, preparation, properties, 243;
– hydrocarbons, see hydrocarbons.
Vinyl esters, preparation from acetaldehyde in the enol form, 459.
Vinylethinylcarbinol, methyl-β-ethoxyethyl, synthesis and transformations of, 1919.
Viscosity of binary systems, calculation of, 801;
– solutions and the hydrogen bond, 203.
Vitamin A synthesis, intermediate products, investigation by infrared absorption spectra, 2193.
Vyshnegradsky's method, reduction of γ-dinitriles by, 295.

Water-organic solutions (alcohol, acetone, ion exchange in), 957;
– system with $Co(NO_3)_2$-$Ni(NO_3)_2$, equilibrium at 20°, 201;
– system with dioxane, heat of dilution of, 1525;
– system with ethyl alcohol-ammonium difluoride at 25°, solubility in, 765;
– system with ethyl alcohol-sodium fluoride at 25°, solubility in, 769;
– system with $Fe_2O_3$-$K_2O$-$SO_3$, physico-chemical analysis of, 1463.

Xanthine, 8-methyl, formation from uric acid, 145;
– structure of the intermediate substance, 135.

Zinc halides, compounds with nicotine, preparation, composition, properties, 1729.
Zirconium iodate, influence of the alkali metals on the composition of, and on reactions in which precipitates are formed, 1863;
– precipitates, composition of, when allowed to stand with solutions containing potassium iodate, 1263.
Zirconium nitrate, reactions in solutions with alkali metal iodates, 1109;
– reactions with iodates of the alkali metals in solutions, 1863;
– solution reactions with alkali metaliodates, 1263.
